# FUME CUPBOARDS

## CHEMFLOW WALK IN

### PRODUCT OVERVIEW

The **Chemflow Walk In** fume cupboard is suited to large volume dispensing and distillation operations.

Manufactured as standard from 6mm thick fabricated sheet PVC. Although we can manufacture from a range of other materials including epoxy painted mild steel and stainless steel, our PVC standard construction offers a much higher chemical resistant longer life fume cupboard.

Designed to meet and surpass the recommendations' laid down in the BS/EN 14175 fume cupboard standards.

Our range of standard sizes is as per the data sheet but our flexibility allows us to meet your exact requirements regarding height, widths and depths of fume cupboard. Sizes above 2000mm in width require a change to a shatter-proof polycarbonate sash.

#### OPTIONAL EXTRAS

Our unique energy saving systems can be installed on our chemflow fume cupboards.
