

# SOLVENT STORAGE

## V-Line Slimline

Safety storage cabinets with vertical drawers for unrestricted storage of flammable hazardous materials in working areas according to EN 14470-1 with a type-tested fire resistance of 90 minutes (Type 90). GS certification has also been applied for and will soon be received. The V-LINE cabinets are available with one (45 cm width) or two (81 cm width) electromotor controlled vertical drawers, in laboratory or industrial designs with various interior equipment to choose from. With a depth of 86 cm, V-LINE cabinets use available space optimally and offer the same storage volume at half the cabinet width as standard cabinets. Innovative vertical drawer technology allows access to all stored containers on both sides. A standard automatic closing system as well as electronic safety elements ensure safety even in the event of a power failure. Outstanding products with a special manufacturing guarantee of up to ten years.

- Robust construction and longevity: stable, high quality and scratch proof cabinet body with powder-coated surface
- Electronic opening and closing: the vertical drawer opens and closes at the push of a button
- Perfect access: the vertical drawer provides an overview and simple access to the stored containers
- Always closed: standard serial closing after approx. 60 seconds with visual and acoustic signal for drawer closure
- Supply and exhaust ventilation: integrated air ducts ready for connection (DN 75) to a exhaust system
- No unauthorized use: vertical drawer lockable with cylinder lock (integration in an existing locking system possible) and locking state indicator (red/green)
- Easy alignment: adjusting aids to compensate for uneven floor
